2 - Functional Specification

This functional specification will give an overview of the different features that have to be included to create the VeBr website. It should give an overview of what needs to be done and what we want to be done. The priority is ranked from 0-10, where 10 is the highest priority.

2.1 - Figure

Functional specification	Description	Priority
Sticky nav	The navigation has to be sticky so the user can navigate whenever he/she is on the page.	10
menu	The menu must have an ID (#) to jump to the section the user wants to look at.	10
Scroll website	The whole site is one site where you scroll down to each section.	10
Work/Knowledge	The first site when you scroll down the website.	10
Open/close box section	On the work and Knowledge section you can click on the buttons and the text goes down the site.	5
Button	Button that gets to see the rest of the content.	8
Knowledge	Dots that tell the user how skilled he is one the different.	8
References	A site with a description of where he has worked.	10
Carousel	A carousel of the references he has from where he worked before.	9
Popup text	Key text from the references is popping up so the first word you see is for exemple "ambitious" in bold font weight.	10

Contact scheme	The contact scheme will have a name, email, phone and a small text where the person can write.	10
Footer	Contact information to the firm and my own signature.	10
Icons	Github and linkedIn	10
Copyright	Copyrights should update themselves every year.	8
